2012-present **Doctoral Training Grant in Environmental Biostatistics:** Provides funding for at least three years

2006-2010 **Undergraduate Awards:** Phi Beta Kappa; John Dows Mairs Prize (University of Rochester Economics Dept); Omicron Delta Epsilon International Honor Society for Economics; Theta Chi Long, Walter, Ott Award; Theta Chi Valentine H. Zahn Fund

Software

bootSVD An R package for implementing fast, exact bootstrap principal component analysis and singular value decompositions for high dimensional data (i.e. > 1 million covariates). Matrices too large for memory can be entered as class `ff` objects, with contents stored on disk. ([CRAN link](#); [GitHub link](#))

ggBrain An R package for beautiful brain image figures with ggplot. This package allows color to be mapped to both (1) tissue intensities of the template image, and (2) values of a voxel-wise test statistic. ([GitHub link](#))

interAdapt An interactive tool for designing and evaluating randomized trials with adaptive enrollment criteria ([Shiny App link](#); [CRAN link](#); [Github link](#)).
